Bosnia's Paralysed Peace
Christopher Bennett
2013-05-01 The scale of international investment in peace-building in Bosnia has been unprecedented. However, despite the massive international commitment in time, resources and effort, a decade and a half later Bosnia's peace is at best paralysed. Christopher Bennett argues that the failure of peace-building is the failure of the liberal peace model. Policy-makers have focused on what should be in terms of trying to reproduce Western liberal democracy, rather than what is in Bosnia, where ethno-national security concerns remain critically important to most people.
Citizens of an Empty Nation-Azra Hromadžić
2015-04-07 In the wake of devastating conflict in Bosnia-Herzegovina, the polarizing effects of everyday ethnic divisions, combined with hardened allegiances to ethnic nationalism and the rigid arrangements imposed in international peace-building agreements, have produced what Azra Hromadžić calls an "empty nation." Hromadžić explores the void created by unresolved tensions between mandated reunification initiatives and the segregation institutionalized by power-sharing democracy, and how these conditions are experienced by youths who have come of age in postconflict Bosnia-Herzegovina. Building on long-term ethnographic research at the first integrated school of Bosnia-Herzegovina, Citizens of an Empty Nation offers a ground-level view of how the processes of reunification play out at the Mostar Gymnasium. Hromadžić details the local effects of the tensions and contradictions inherent in the processes of postwar state-making, shedding light on the larger projects of humanitarian intervention, social cohesion, cross-ethnic negotiations, and citizenship. In this careful ethnography, the Mostar Gymnasium becomes a powerful symbol for the state's simultaneous segregation and integration as the school's shared halls, bathrooms, and computer labs foster dynamic spaces for a rich cross-ethnic citizenship—or else remain empty.

International Intervention, Identity and Conflict Transformation-Timea Spitka
2015-12-22 This book addresses the challenges of international intervention in violent conflicts and its impact on groups in conflict. When the international community intervenes in a violent internal conflict, intervening powers may harden divisions, constructing walls between groups, or they may foster transformation, soften barriers and build bridges between conflicting groups. This book examines
the different types of external processes and their respective contributions to softening or hardening divisions between conflicting groups. It also analyses the types of conflict resolution strategies, including integration, accommodation and partitioning, and investigates the conditions under which the international community decides to pursue a particular strategy, and how the different strategies contribute to solidification or transformation of group identities. The author uses three case studies, Bosnia and Herzegovina (BiH), Northern Ireland and Israel-Palestine, to reveal how different types of external interventions impact on the identities of conflicting groups. The volume seeks to address how states and international organizations ought to intervene in order to stimulate the building of bridges rather than walls between conflicting groups. In doing so, the book sheds light on some of the pitfalls in international interventions and highlights the importance of united external process and inclusive identity strategies that promote transformation and bridge differences between conflicting groups. This book will be of much interest to students of intervention, peace and conflict studies, ethnic conflict, security studies and IR.

**Humanitarian Intervention and the Responsibility to Protect**- Cristina Gabriela Badescu 2010-11-23 This book explores attempts to develop a more acceptable account of the principles and mechanisms associated with humanitarian intervention, which has become known as the ‘Responsibility to Protect’ (R2P). Cases of genocide and mass violence have raised endless debates about the theory and practice of humanitarian intervention to save innocent lives. Since the humanitarian tragedies in Rwanda, Burundi, Bosnia, Kosovo and elsewhere, states have begun advocating a right to undertake interventions to stop mass violations of human rights from occurring. Their central concern rests with whether the UN’s current
regulations on the use of force meet the challenges of the post-Cold War world, and in particular the demands of addressing humanitarian emergencies. International actors tend to agree that killing civilians as a necessary part of state formation is no longer acceptable, nor is standing by idly in the face of massive violations of human rights. And yet, respect for the sovereign rights of states remains central among the ordering principles of the international community. How can populations affected by egregious human rights violations be protected? How can the legal constraints on the use of force and respect for state sovereignty be reconciled with the international community’s willingness and readiness to take action in such instances? And more importantly, how can protection be offered when the Security Council, which is responsible for authorizing the use of force when threats to international peace and security occur, is paralyzed? The author addresses these issues, arguing that R2P is the best framework available at present to move the humanitarian intervention debate forward. This book will be of interest to students of the responsibility to protect, war and conflict studies, human security, international organisations, security studies and IR in general.

A Neglected Right - Senada Zatagić 2022-05-05 The right to be elected, although an important political right guaranteed in human rights documents on international and regional levels, is still an under-researched and undertheorized concept with many synonyms in use. While the right to vote is often correlated with democracy, the closely related right to be elected is often neglected, and the constitutions of most countries are silent about it. The 2009 European Court of Human Rights (ECtHR) decision in the case of Sejdić and Finci v. Bosnia and Herzegovina started the discussions concerning the discrimination in enjoyment of the right to be elected in Bosnia and Herzegovina. Although the right to be elected is not explicitly
guaranteed in the Dayton Constitution but only in the Law on Election, the ECtHR considered equal enjoyment of this right by everyone in Bosnia and Herzegovina of high importance and declared the relevant Dayton Constitution’s provisions discriminatory. The book explains the conceptual relevance of the right to be elected, its interrelatedness with the right to vote and both these rights’ significance for democratic systems. Through analyzing and explaining the regional human rights tribunal’s decisions concerning the right to be elected, the importance of this political right is elucidated.

Political Handbook of the World 2020-2021 - Tom Lansford 2021-04-20

The Political Handbook of the World by Tom Lansford provides timely, thorough, and accurate political information, with more in-depth coverage of current political controversies than any other reference guide. The updated 2020-2021 edition will continue to be the most authoritative source for finding complete facts and analysis on each country’s governmental and political makeup. Compiling in one place more than 200 entries on countries and territories throughout the world, this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system. The Political Handbook of the World 2020-2021 also provides names of key ambassadors and international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and UN agencies. And this update will aim to include coverage of current events, issues, crises, and controversies from the course of the last two years.

The Political Handbook of the World provides timely, thorough, and accurate political information, with more in-depth coverage of current political controversies than any other reference guide. The updated
2018-2019 edition will continue to be the most authoritative source for finding complete facts and analysis on each country’s governmental and political makeup. Compiling in one place more than 200 entries on countries and territories throughout the world, this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system. It also provides names of key ambassadors and international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and UN agencies. This comprehensive update will include coverage of current events, issues, crises, and controversies from the course of the last two years, including: Elections across Europe Referendum in Ireland Rohingya genocide in Myanmar The Venezuelan dictatorship The renaming of Swaziland to eSwatini Qatar diplomacy changes Historic meeting between the United States and North Korea Establishment of a new governing coalition in Liberia

**Political Handbook of the World 2016-2017**-Tom Lansford 2017-03-31
Published since 1928, the Political Handbook of the World provides timely, thorough, and accurate political information with more in-depth coverage of current political controversies and political parties than any other reference guide. The updated 2016–2017 Edition continues this legacy as the most authoritative source for finding complete facts and analysis on each country’s governmental and political makeup. Political science and international relations scholars have revised this edition, and made understanding complex foreign affairs and political situations easy and accessible. With more than 200 entries on countries and territories throughout the world, housed in one place, these volumes are renowned for their extensive coverage of all major and minor political parties and groups in each political system. They also provide names of key ambassadors and
international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and United Nations agencies. This comprehensive update will include coverage of current events, issues, crises, and controversies from the course of the last two years, including: The closely-watched U.S. presidential election The effect of the Brexit referendum and installment of a new British prime minister The extensive investigation and subsequent impeachment of Brazil’s president The far-reaching impact of the “Panama Papers” scandal Changes in U.S.–Cuba diplomatic relations and the reopening of their embassies The unconstitutional declaration of Gambia as an Islamic State Sentiments about the migrant and refugee crisis across Europe and the influence on policy Also, the new “For Further Reference” feature included for every country entry directs readers to additional resources to continue their research.

Personnel Turnover and the Legitimacy of the EU
John A. Scherpereel
2021-07-28 This book examines the effects of personnel turnover in European Union institutions. Individuals enter and exit EU institutions with remarkable frequency, and questions involving institutional personnel lie at the heart of populist and feminist critiques of the EU. Are these critiques accurate? How do personnel dynamics affect the EU’s legitimacy? Will changing patterns of turnover help to redeem the EU? Personnel Turnover addresses these issues by considering turnover’s effects on three aspects of legitimacy (input, throughput, and output). Authors use a common framework to explore various questions: Does turnover affect the ways that EU citizens see the EU or the likelihood that citizens will participate in EU elections? Does turnover affect the efficiency of the EU decision-making or the EU’s ability to promote its interests abroad? In tackling these contemporary subjects, the authors throw light on a
classical question—what difference does it make when political leaders are replaced?

This Was Not Our War-Swanee Hunt 2004-11-29 A collection of first-person accounts by twenty-six Bosnian women--representing a range of ethnic traditions and heritages--who are reconstructing their society following years of warfare offers a narrative framework designed to connect the women's stories to their experiences.

The War in Bosnia-Herzegovina-Steven L. Burg 1999-01-13 This is a probing examination of the historical, cultural, and political dimensions of the crisis in Bosnia and the international efforts to resolve it. It provides a detailed analysis of international proposals to end the fighting, from the Vance-Owen plan to the Dayton accord, with special attention to the national and international politics that shaped them. It analyzes the motivations and actions of the warring parties, neighboring states, and international actors including the United States, the United Nations, the European powers, and others involved in the war and the diplomacy surrounding it. With guides to sources and documentation, abundant tabular data, and over thirty maps, this will be the definitive volume on the most vexing conflict of the post-Soviet period. One reviewer commented: Superb! There is nothing like it. Extraordinarily knowledgeable and well-documented. It has depth, it's insightful, and it's intelligent. The analysis is brilliant; it captures the goals and motives of the parties as well as their priorities. It will get lots of attention.

Orthodox Churches and Politics in Southeastern Europe-Sabrina P. Ramet 2019-09-18 Orthodox Churches, like most religious bodies, are inherently political: they seek to defend their core values and must engage in politics to do so, whether by promoting certain legislation or seeking to block
other legislation. This volume examines the politics of Orthodox Churches in Southeastern Europe, emphasizing three key modes of resistance to the influence of (Western) liberal values: Nationalism (presenting themselves as protectors of the national being), Conservatism (defending traditional values such as the “traditional family”), and Intolerance (of both non-Orthodox faiths and sexual minorities). The chapters in this volume present case studies of all the Orthodox Churches of the region.

**Peace Operations and Intrastate Conflict**-Thomas R. Mockaitis 1999 Based upon consideration of United Nation missions to the Congo (1960-64), Somalia (1992-95), and the former Yugoslavia (1992-95) and examination of counterinsurgency campaigns, Mockaitis develops a new model for intervening in intrastate conflicts and commends the British approach to civil strife as the basis for a new approach to peace operations. Both contemporary and historic examples demonstrate that military intervention to end civil conflict differs radically from traditional peacekeeping. Ending a civil war requires the selective and limited use of force to stop the fighting, safeguard humanitarian aid work, and restore law and order. Since intrastate conflict resembles insurgency far more than it does any other type of war, counterinsurgency principles should form the basis of a new intervention model. A comprehensive approach to resolve intrastate conflict requires that peace forces, NGOs, and local authorities cooperate in rebuilding a war-torn country. Only the British have enjoyed much success in counterinsurgency campaigns. Starting from the three broad principles of minimum force, civil-military cooperation, and flexibility, the British approach in responding to insurgency has combined the limited use of force with political and civil development. Carefully considered and correctly applied, these principles could produce a more effective model for peace operations to
end intrastate conflict.

**To End a War** - Richard Holbrooke 1999-05-25
The architect of the Dayton peace accords recounts the perilous diplomatic negotiations that finally brought peace to Bosnia

**Armed Peacekeepers in Bosnia**

**To Move the World** - Jeffrey D. Sachs 2013-06-04
An inspiring look at the historic foreign policy triumph of John F. Kennedy’s presidency—the crusade for world peace that consumed his final year in office—by the New York Times bestselling author of The Price of Civilization, Common Wealth, and The End of Poverty

The last great campaign of John F. Kennedy’s life was not the battle for reelection he did not live to wage, but the struggle for a sustainable peace with the Soviet Union. To Move the World recalls the extraordinary days from October 1962 to September 1963, when JFK marshaled the power of oratory and his remarkable political skills to establish more peaceful relations with the Soviet Union and a dramatic slowdown in the proliferation of nuclear arms. Kennedy and his Soviet counterpart, Nikita Khrushchev, led their nations during the Cuban Missile Crisis, when the two superpowers came eyeball to eyeball at the nuclear abyss. This near-death experience shook both leaders deeply. Jeffrey D. Sachs shows how Kennedy emerged from the Missile crisis with the determination and prodigious skills to forge a new and less threatening direction for the world. Together, he and Khrushchev would pull the world away from the nuclear precipice, charting a path for future peacemakers to follow. During his final year in office, Kennedy gave a series of speeches in which he pushed back against the momentum of the Cold War to persuade the world that peace with the Soviets was possible. The oratorical high point came on June 10, 1963, when Kennedy delivered the most important foreign policy speech of the
modern presidency. He argued against the prevailing pessimism that viewed humanity as doomed by forces beyond its control. Mankind, argued Kennedy, could bring a new peace into reality through a bold vision combined with concrete and practical measures. Achieving the first of those measures in the summer of 1963, the Partial Nuclear Test Ban Treaty, required more than just speechmaking, however. Kennedy had to use his great gifts of persuasion on multiple fronts—with fractious allies, hawkish Republican congressmen, dubious members of his own administration, and the American and world public—to persuade a skeptical world that cooperation between the superpowers was realistic and necessary. Sachs shows how Kennedy campaigned for his vision and opened the eyes of the American people and the world to the possibilities of peace. Featuring the full text of JFK’s speeches from this period, as well as striking photographs, To Move the World gives us a startlingly fresh perspective on

Kennedy’s presidency and a model for strong leadership and problem solving in our time. Praise for To Move the World “Rife with lessons for the current administration . . . We cannot know how many more steps might have been taken under Kennedy’s leadership, but To Move the World urges us to continue on the journey.”—Chicago Tribune “The messages in these four speeches seem all too pertinent today.”—Publishers Weekly

Enemies on the Couch-
Vamik D. Volkan 2014-07-01
For more than 30 years, renowned psychoanalyst Vamik D. Volkan has applied the theories of his profession to societies in conflict, venturing into cauldrons of unrest as observer, mediator, and practitioner. In this volume, he shares his experiences facilitating dialogue between opposing enemy groups, in numerous contexts and conflict zones, and presents the pioneering theoretical and practical frameworks he developed. In the process, he provides a unique window onto
watershed moments of the recent past—from major historical events, such as the collapse of the Soviet Union and the fall of the Berlin Wall, to the tragedy of September 11, 2001, and continued violence in the Middle East. The findings and observations presented in this volume provide not only a new way of looking at recent historical events, but also offer a novel set of tools for understanding and shaping the present and future.

Alliance Formation in Civil Wars-Fotini Christia
2012-11-12 Some of the most brutal and long-lasting civil wars of our time involve the rapid formation and disintegration of alliances among warring groups, as well as fractionalization within them. It would be natural to suppose that warring groups form alliances based on shared identity considerations - such as Christian groups allying with Christian groups - but this is not what we see. Two groups that identify themselves as bitter foes one day, on the basis of some identity narrative, might be allies the next day and vice versa. Nor is any group, however homogeneous, safe from internal fractionalization. Rather, looking closely at the civil wars in Afghanistan and Bosnia and testing against the broader universe of fifty-three cases of multiparty civil wars, Fotini Christia finds that the relative power distribution between and within various warring groups is the primary driving force behind alliance formation, alliance changes, group splits and internal group takeovers.

The Accidental Empire-Gershom Gorenberg
2007-03-06 The untold story, based on groundbreaking original research, of the actions and inactions that created the Israeli settlements in the occupied territories After Israeli troops defeated the armies of Egypt, Syria, and Jordan in June 1967, the Jewish state seemed to have reached the pinnacle of success. But far from being a happy ending, the Six-Day War proved to be the opening act of a complex political drama, in which the central
issue became: Should Jews build settlements in the territories taken in that war? The Accidental Empire is Gershom Gorenberg's masterful and gripping account of the strange birth of the settler movement, which was the child of both Labor Party socialism and religious extremism. It is a dramatic story featuring the giants of Israeli history—Moshe Dayan, Golda Meir, Levi Eshkol, Yigal Allon—as well as more contemporary figures like Ariel Sharon, Yitzhak Rabin, and Shimon Peres. Gorenberg also shows how the Johnson, Nixon, and Ford administrations turned a blind eye to what was happening in the territories, and reveals their strategic reasons for doing so. Drawing on newly opened archives and extensive interviews, Gorenberg reconstructs what the top officials knew and when they knew it, while weaving in the dramatic first-person accounts of the settlers themselves. Fast-moving and penetrating, The Accidental Empire casts the entire enterprise in a new and controversial light, calling into question much of what we think we know about this issue that continues to haunt the Middle East.

Arbitrating for Peace—Joel Dahlquist 2016-09-04
Although short of attaining the ideal of a 'substitute for war', arbitration has largely succeeded in peacefully resolving international disputes. Beyond that, arbitral commitments and arbitral processes have deepened civilized and cooperative international relations, promoted the development of international law and international institutions, and facilitated the well-being of mankind in multiple important ways. Particulars of that proposition are set forth in this one-of-a-kind book. Each of the fourteen chapters is devoted to one landmark international arbitration case, primarily state-to-state but also includes commercial disputes with geopolitical dimensions. Each chapter is written by a practitioner and/or academic of high international standing. The project was initiated by the Stockholm Chamber of Commerce, which celebrates
its centennial in 2017. By focusing on landmark cases, the book contributes to a continued dynamic development of dispute resolution in complicated or sensitive geopolitical contexts, and demonstrates how arbitration has and can continue to play an important role for international relations. Practitioners, political decision makers, and academics in any part of the world with an interest in international arbitration and international law or political history and policy on an international level will find it not only deeply informative but also immensely useful.

**Overcoming Obstacles to Peace** - James Dobbins 2013

"This volume analyzes the impediments that local conditions pose to successful outcomes of nation-building interventions in conflict-affected areas. Previous RAND studies of nation-building focused on external interveners' activities. This volume shifts the focus to internal circumstances, first identifying the conditions that gave rise to conflicts or threatened to perpetuate them, and then determining how external and local actors were able to modify or work around them to promote enduring peace. It examines in depth six varied societies: Cambodia, El Salvador, Bosnia and Herzegovina, East Timor, Sierra Leone, and the Democratic Republic of the Congo. It then analyzes a larger set of 20 major post-Cold War nation-building interventions. The authors assess the risk of renewed conflict at the onset of the interventions and subsequent progress along five dimensions: security, democratization, government effectiveness, economic growth, and human development. They find that transformation of many of the specific conditions that gave rise to or fueled conflict often is not feasible in the time frame of nation-building operations but that such transformation has not proven essential to achieving the primary goal of nation-building -- establishing peace. Most interventions in the past 25 years have led to enduring peace, as well as some degree of improvement in the other
dimensions assessed. The findings suggest the importance of setting realistic expectations -- neither expecting nation-building operations to quickly lift countries out of poverty and create liberal democracies, nor being swayed by a negative stereotype of nation-building that does not recognize its signal achievements in the great majority of cases."--Page 4 of cover.

The Bosnian Conflict-Alexander Cruden 2011-12-27
This dramatic volume introduces the conflict in Bosnia that affected citizens of the same nation, who savaged each other with massacres and mass rape of civilians as a war tactic. Essays are compiled from a variety of sources and are carefully edited and introduced to provide context for readers unfamiliar with the Bosnian conflict. Essay sources include Margaret Thatcher, Bill Clinton, and The Militant. Readers will examine the background and the causes of the conflict. The last chapter offers unforgettable first-hand accounts and narratives about people who were personally impacted by the conflict.

Sustaining the Peace After Civil War-T. David Mason

The Political Economy of War and Peace-Murray Wolfson 2012-12-06
cancer n. any malignant tumor . . . Metastasis may occur via the bloodstream or the lymphatic channels or across body cavities . . . setting up secondary tumors . . . Each individual primary tumor has its own pattern . . . There are probably many causative factors . . . Treatment . . depends on the type of tumor, the site of the primary tumor and the extent of the spread. (Oxford Concise Medical Dictionary 1996, 97) Let us begin by stating the obvious. Acts of organized violence are not necessarily of human nature, but they are endogenous events arising within the an intrinsic part evolution of complex systems of social interaction. To be sure, all wars have features in
common - people are killed and property is destroyed - but in their origin wars are likely to be at least as different as the social structures from which they arise. Consequently, it is unlikely that there can be a simple theory of the causes of war or the maintenance of peace. The fact that wars are historical events need not discourage us. On the contrary, we should focus our understanding of the dimensions of each conflict, or classes of conflict, on the conjuncture of causes at hand. It follows that the study of conflict must be an interdisciplinary one. It is or a penchant for eclecticism that leads to that conclusion, but the not humility multi-dimensionality of war itself.

Regime Change in the Yugoslav Successor States-
Mieczysław P. Boduszyński
2010-04-26 Scholars, practitioners, and policymakers will find the book to be a compelling contribution to the study of comparative politics, democratization, and European integration.

Ethnic Nationalism-Bogdan Denis Denitch 1996 This essential resource provides a cogent, comprehensive historical analysis of Yugoslavia's demise, one that clearly identifies events and trends that urgently demand the world's attention.

War Is a Force that Gives Us Meaning-Chris Hedges 2014-04-08 As a veteran war correspondent, Chris Hedges has survived ambushes in Central America, imprisonment in Sudan, and a beating by Saudi military police. He has seen children murdered for sport in Gaza and petty thugs elevated into war heroes in the Balkans. Hedges, who is also a former divinity student, has seen war at its worst and knows too well that to those who pass through it, war can be exhilarating and even addictive: “It gives us purpose, meaning, a reason for living.” Drawing on his own experience and on the literature of combat from Homer to Michael Herr,
Hedges shows how war seduces not just those on the front lines but entire societies—corrupting politics, destroying culture, and perverting basic human desires. Mixing hard-nosed realism with profound moral and philosophical insight, War Is a Force that Gives Us Meaning is a work of terrible power and redemptive clarity whose truths have never been more necessary.

**Policies and Politics of Teaching Religion**-Theodor Hanf 2015-03-26 In states in which the public role of religion is controversial, religious instruction becomes both a means and an end of politics. This groundbreaking collection of case studies drawn from Arab, Asian and European countries examines different aspects of religious instruction: how it is regulated, who decides its content, the values it imparts and, in particular, whether it triggers, deepens or reduces conflict.

**Yugoslavia's Bloody Collapse**-Christopher Bennett 1997-01-01 Over the past two years, the entire world watched in horror as one of Europe's most stable countries plunged into an orgy of violence and bloodshed that has invoked comparisons to the Holocaust. Aside from empty threats and diplomatic hand wringing, the West has done little to stop the ethnic cleansing, the sieges, and the brutality that has characterized the conflict in the former Yugoslavia. Contrary to common wisdom, the hyper-violent disintegration of the former Yugoslavia is not simply and exclusively the product of inherent and irrational ethnic animosities and centuries of strife. In this engaging book, journalist Christopher Bennett traces the turning point to the 1987 struggle within the Serbian Communist party which was between adherents of a Serb nationalist ideology - embodied by Slobodan Milosevic- and the other Yugoslavs who clung to the vision of a multinational state. As soon as Milosevic gained the upper hand, he ruthlessly purged his rivals and launched a massive campaign
of media indoctrination to stir up Serb nationalism. This new nationalism, which has repelled the world since 1991, is primarily Milosevic's creation and not merely the result of historical enmity. As a student at two different Yugoslav universities in the 1980's, Bennett witnessed firsthand many of the critical events which contributed to Yugoslavia's destruction. He renders an incisive and accessible history, covering the period from Tito's dictatorship to the present day.

The Cellist of Sarajevo-
Steven Galloway 2009-02-24
This brilliant novel with universal resonance tells the story of three people trying to survive in a city rife with the extreme fear of desperate times, and of the sorrowing cellist who plays undaunted in their midst. One day a shell lands in a bread line and kills twenty-two people as the cellist watches from a window in his flat. He vows to sit in the hollow where the mortar fell and play Albinoni’s Adagio once a day for each of the twenty-two victims. The Adagio had been re-created from a fragment after the only extant score was firebombed in the Dresden Music Library, but the fact that it had been rebuilt by a different composer into something new and worthwhile gives the cellist hope. Meanwhile, Kenan steels himself for his weekly walk through the dangerous streets to collect water for his family on the other side of town, and Dragan, a man Kenan doesn’t know, tries to make his way towards the source of the free meal he knows is waiting. Both men are almost paralyzed with fear, uncertain when the next shot will land on the bridges or streets they must cross, unwilling to talk to their old friends of what life was once like before divisions were unleashed on their city. Then there is “Arrow,” the pseudonymous name of a gifted female sniper, who is asked to protect the cellist from a hidden shooter who is out to kill him as he plays his memorial to the victims. In this beautiful and unforgettable novel, Steven Galloway has taken an extraordinary, imaginative leap to create a story that
A Constitution of the People and How to Achieve It

Aarif Abraham 2021-04-30

Britain does not have a written constitution. It has rather, over centuries, developed a set of miscellaneous conventions, rules, and norms that govern political behavior. By contrast, Bosnia’s constitution was written, quite literally, overnight in a military hanger in Dayton, USA, to conclude a devastating war. By most standards it does not work and is seen to have merely frozen a conflict and all development with it. What might these seemingly unrelated countries be able to teach each other? Britain, racked by recent crises from Brexit to national separatism, may be able to avert long-term political conflict by understanding the pitfalls of writing rigid constitutional rules without popular participation or the cultivation of good political culture. Bosnia, in turn, may be able to thaw its frozen conflict by subjecting parts of its written constitution to amendment, with civic involvement, on a fixed and regular basis; a ‘revolving constitution’ to replicate some of that flexibility inherent in the British system. A book not just about Bosnia and Britain; a standard may be set for other plural, multi-ethnic polities to follow.

Deliver Us From Evil

William Shawcross
2002-01-10

Reporting from war zones around the globe, acclaimed journalist William Shawcross gives us an unforgettable portrait of a dangerous world and of the brave men and women, ordinary and extraordinary, who risk their lives to make and keep the peace. The end of the Cold War was followed by a decade of regional and ethnic wars, massacres and forced exiles, and by constant
calls for America to lead the international community as chief peace-keeper. The efforts of that community -- identified with the United Nations but often dominated by the world's wealthy nations -- have had mixed results. In Africa, the West is accused of indifference or too little, too late. In Cambodia, the UN presides over free elections, but the results are overridden. In Iraq, Saddam Hussein continues to defy the UN, and in Bosnia and Kosovo, the West acts hesitantly after terrible slaughter and ethnic cleansing. Shawcross, a veteran of many war zones, has had broad access to global policymakers, including UN secretary general Kofi Annan, high American diplomats, peacekeepers and humanitarian-aid professionals. He has traveled with them to some of the world's most horrifying killing fields. Deliver Us from Evil is his stark, on-the-ground report on the many crises faced by the international community and its servants as they struggle to respond around the world. He brings home the price many have paid attempting to restore peace and help alleviate terrible suffering. He illuminates the risks we face in a complex and dangerous world. Some critics have concluded that some interventions may prolong conflict and create further casualties. The lesson we learn from ruthless and vengeful warlords the world over is that goodwill without strength can make things worse. Shawcross argues that recent interventions -- in Kosovo and East Timor, for example -- provide reason for concern as well as hope. Still, the unmistakable message of the past decade is that we cannot intervene everywhere, that not every wrong can be righted merely because the international community desires it, or because we wish to remove images of suffering from our television screens. Nor can we necessarily rebuild failed states in our image. When we intervene, we must be certain of our objectives, sure of popular support and willing to expend the necessary resources -- even lives. If our interventions are to be effective and humane, they must last for
more than the fifteen minutes of attention that the media accord to each succeeding crisis. That is a tall order. As Shawcross concludes, "In a more religious time it was only God whom we asked to deliver us from evil. Now we call upon our own man-made institutions for such deliverance. That is sometimes to ask for miracles."

Bosnia and Beyond - Jeanne M. Haskin 2006 Could the US, should the US, have prevented the break up of Yugoslavia? The author examines the dire consequences of the rapid economic reforms demanded by the West and asks where responsibility lies when external pressures destroy a nation and lead to national meltdown. Bosnia and Beyond: The "Quiet" Revolution that wouldn't go quietly is, in part, the story of how the West destroyed a country through the imposition of economic and political reform. Promoted as a way to modernize Yugoslavia and bring it into the mainstream, the program was in fact meant to bring down the Communist government in a "quiet revolution" of the type that was envisaged for other former Soviet bloc countries. Showing how Western plans for the liberalization of the country resulted in ethnic polarization and the election of ethno-nationalist leaders, the book then goes on to describe the events of the war. The struggle of the republics for independence was yet another proxy war, which the West encouraged in order to chastise Milosevic and nudge him into becoming the man that they wanted him to be. While no formal plan has surfaced to show that the whole thing was engineered to provide a base for US/NATO troops, on the other hand, the situation was so egregious that intervention was highly sought and that the West had an obligation to clean up its mess, which it finally did. Many have been emotionally manipulated into being grateful for NATO intervention, and then it was quite convenient that a NATO base existed. But how does one say that intervention was needful, and then point the
finger at the intervening forces? One can claim that Germany, Austria and the Vatican were in favor of Croatian and Slovenian secession and the US came late to the game to demand Bosnian independence. It can also be claimed that Britain and France did not stand in the way of Serbian secession within Bosnia and Croatia but rather promoted their goals. Yugoslavia was a case of secession within secession, raising the question of who was supported by whom in either case Bosnia is a case study similar to the other color revolutions. If a small number of people are manipulated into taking to the streets and are given almighty support from the outside, against their legitimate government - then 200 today brings 2,000 tomorrow and the targeted government sits paralyzed and watches the takeover. Only that in Bosnia it fought back. * Jeanne Haskin studied international relations at Central Connecticut State University of New Britain and political science and international diplomacy at Yale University, with a focus on conflict and crisis management in warring situations. Bosnia and Beyond: The "Quiet" Revolution that wouldn't go quietly is her second book. The Tragic State of the Congo: From Decolonization to Dictatorship was published in 2005 by Algora Publishing.

**Building Security in Post-Cold War Eurasia**-P. Terrence Hopmann 1999

**Beyond Terror**-Ralph Peters 2002-04-01 In the precursor to his groundbreaking Beyond Baghdad, which dissects the war in Iraq and its implications for the West and the Islamic world, acclaimed military strategist and author Ralph Peters assembles 18 essays, some written before and others after the September 11 attacks, that show his writing at its best. Always one step ahead of other military strategists, Peters evaluates the status quo of world affairs and brings years of experience as an Army insider to bear on the state of terrorism in the world
today in a collection that has already had a wide influence among government and media since its publication in 2002. Beyond Terror takes us far beyond the intellectual prison of traditional wisdom to offer the most original thinking available on the strategic challenges confronting the United States in the twenty-first century.

**Conflict, Security and the Reshaping of Society**
Alessandro Dal Lago
2010-07-13 A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform, www.oapen.org. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book is an examination of the effect of contemporary wars (such as the 'War on Terror') on civil life at a global level. Contemporary literature on war is mainly devoted to recent changes in the theory and practice of warfare, particular those in which terrorists or insurgents are involved (for example, the 'revolution in military affairs', 'small wars', and so on). On the other hand, today's research on security is focused, among other themes, on the effects of the war on terrorism, and on civil liberties and social control. This volume connects these two fields of research, showing how 'war' and 'security' tend to exchange targets and forms of action as well as personnel (for instance, the spreading use of private contractors in wars and of military experts in the 'struggle for security') in modern society. This shows how, contrary to Clausewitz's belief war should be conceived of as a "continuation of politics by other means", the opposite statement is also true: that politics, insofar as it concerns security, can be defined as the 'continuation of war by other means'. This book will be of much interest to students of critical security studies, war and conflict studies, terrorism studies, sociology and IR in general. Salvatore Palidda is Professor of Sociology in the Faculty of Education at
University of Genoa. Alessandro Dal Lago is Professor of Sociology of Culture and Communication at the University of Genoa.

**The History of Bosnia**
Marko Attila Hoare 2007 The first comprehensive study of national identity in Bosnia-Herzegovina.

**The South Slav Conflict**
Raju G.C Thomas 2021-12-13 First Published in 1996. In identifying the causes of such a national and international failure in conflict management, The South Slav Conflict becomes a valuable case study in comparative politics and international relations. Edited by Raju G. C and H. Richard Frim. The book’s great strength begins with its forthright assertion that no serious attempt to explain the current cycle of genocide and revenge among Serbs, Croats, and Bosnians can avoid the inherent complexity of the factors that transform ed Yugoslavia from one of the most pluralist of European communist states into a theater of human misery.
