Banking's Final Exam-Morris Goldstein 2017-05-30 Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009, stress testing of large financial institutions has become the cornerstone of banking supervision worldwide. The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable. In Banking's Final Exam, one of the world's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses, leading to a false sense of reassurance about the safety and soundness of the banking system. Some weaknesses can be corrected within the existing bank-capital regime, but others will require bold reforms—including higher minimum capital requirements for the largest and most systemically-important banks. The banking industry is likely to resist these reforms, but this

book explains why their objections do not hold water.

The Test-Anya Kamenetz 2015-01-06 "[The anti-testing] movement now has a guidebook. . . . Kamenetz shows how fundamentally American it would be to move toward a more holistic system." -- New York Times Book Review The Test is an essential and critically acclaimed book for any parent confounded by our national obsession with standardized testing. It recounts the shocking history and tempestuous politics of testing and borrows strategies from fields as diverse as games, neuroscience, and ancient philosophy to help children cope. It presents the stories of families, teachers, and schools maneuvering within and beyond the existing educational system, playing and winning the testing game. And it points the way toward a hopeful future of better tests and happier kids.

Dimensions of Constitutional Democracy-

Anupama Roy 2020-06-01 This book examines a selection of themes that have become salient in contemporary debates on constitutional democracies. It focuses in particular on the experiences of India and Germany as examples of post-war and post-colonial constitutional democracies whose trajectories illustrate democratic transitions and transformative constitutionalism. While transformative constitutionalism has come to be associated specifically with the post-apartheid experience in South Africa, this book uses the transformative

as an analytical framework to transcend the dichotomy of west and east and explore how temporally coincident constitutions have sought to install constitutional democracies by breaking with the past. While the constitution-making processes in the two countries were specific to their political contexts, the constitutional promises and futures converged. In this context, the book explores the themes of Constitutionalism, Nationalism, Secularism, Sovereignty and Rule of Law, Freedoms and Rights, to investigate how the contestations over democratic transitions and democratic futures have unfolded in the two democracies. It offers readers valuable insights into how the normative frameworks of constitutional democracy take concrete form at specific sites of democratic and constitutional imagination in Dalit and Islamic writings, as well as the relationship between state and religion in the writings of public intellectuals, political and legal philosophers. The book also focuses on specific sites of contestation in democracies including the relationship between sovereignty and citizenship in post-colonial India, free speech and sedition in liberal democracies, questions of land rights in connection with economic and political changes in contemporary contexts, and the rights of indigenous communities with regard to international conventions and domestic law. Given its scope, it will be of interest to students and scholars of political theory, political philosophy, comparative constitutionalism, law and human rights.
